When it comes to web development I have experience working as a React.js developer. In-depth knowledge of JavaScript, CSS, HTML, and front-end languages. Knowledge of React tools including React.js, Webpack, Enzyme, Redux, and Flux. Experience with user interface design. Experience with browser-based debugging and performance testing software. Excellent troubleshooting skills. Good project management skills. Collaborates closely with product managers, designers, and other engineering teams.

I'm also a experienced mobile app developer who has a track record of success creating apps that are both well-received and commercially viable. Skilled with working as a team and incorporating input into projects. Ability to always look for ways to improve upon an already existing app to keep people downloading it and enjoying it. Strong eye for detail and tenacity to never quit on something until it is absolutely perfect.

I possess a wide range of skills and expertise in various design platforms, including Adobe Photoshop, Adobe Illustrator, Figma, and other design software. I have a great foundation in graphic design principles and a keen eye for aesthetics. My ability to create visually appealing and effective designs sets me apart. I am well-versed in Adobe Illustrator, enabling me to create vector-based graphics, logos, icons, and illustrations with precision and creativity. I have a thorough understanding of typography, color theory, and composition, which allows me to produce impactful designs.

I love to hear from you. Whether you have a question or potential project — shoot me a message.
